Professional Summary

Cybersecurity-focused Computer Science student with hands-on experience in security monitoring, network traffic analysis, PCAP investigation, IDS/IPS development, and defensive security engineering. Skilled in SIEM concepts, incident triage, protocol analysis, vulnerability assessment, and security automation. Experienced in building security tools and intelligence platforms using Python, Go, React, and Streamlit.

Work Experience

CyberWolf

2024 – Present

Cybersecurity Analyst & Developer

- Develop security tools for real-time monitoring, network traffic analysis, threat detection, and incident triage workflows using Python and Go.
- Research defensive mitigation strategies aligned with OWASP Top 10 and deliver cybersecurity sessions covering DNS analysis, email security, and reconnaissance.
- Organize and coordinate cybersecurity conferences, technical workshops, hackathons, and technical events.

Security Engineering Projects

WolfX V1.0 — Real-Time Application Security Intelligence Platform (RASIP)

Go, Python

- Built a security monitoring platform with event aggregation, real-time alert visualization, suspicious-activity monitoring, and a SOC-inspired operational interface.

Cyprolib & Wolf-Runtime — IDS/IPS Ecosystem

Python, React, Node.js

- Developed a custom IDS/IPS framework for traffic inspection and threat detection. Created **Cyprolib**, a Python security analysis package for network scanning and defensive operations, and built Wolf-Runtime for executing security rules and rendering real-time alerts.

NetX Sentry — Network Forensic & Traffic Analysis Platform

Python, Streamlit, Wireshark

- Built a PCAP analysis platform with network-stream visualization and protocol-level inspection for anomaly detection, forensic investigation, and incident analysis.

X-MalForensics-XGBoost — Windows PE Malware Detection

Python, XGBoost, EMBER 2018

- Developed an XGBoost-based model trained on the EMBER 2018 dataset to classify malicious Windows Portable Executable (PE) files using static PE features for automated malware detection.

Education

SKP Engineering College (Affiliated to Anna University)

Expected 2027

B.E. Computer Science and Engineering (Cybersecurity)

CGPA: 8.0

Achievements & Certifications

- Secured 1st place in 10+ national-level hackathons including Hack India, IFET Hackathon, and Taksha Sheela University Hackathon.
- Participated and presented at 50+ national-level technical conferences and engineering events.
- **Splunk Fundamentals 1** — Splunk Education (*In Progress*)
- **Certified Online Fraud Prevention Specialist (COFPS)** · Hack&fix Accademy
- **Cybersecurity Workshop Operations Certificate** · Center for Innovation and Software Learning

Technical Skills

Cybersecurity: SIEM Fundamentals, Security Monitoring, Incident Triage, Network Traffic Analysis, PCAP Analysis, Deep Packet Inspection, IDS/IPS, Threat Detection, Vulnerability Assessment, Network Forensics

Security Tools: Wireshark, Splunk, Burp Suite, Nmap, Git

Programming: Python, Go, C++, Node.js

Frameworks: React, Streamlit

Security Automation: Detection Engineering, Security Automation, Threat Intelligence Integration, Local LLM Deployment, Security Log Analysis
